

Environmental Policy

Multi Span Australia's Environmental vision statement is to create built environments that cause minimal impact to existing flora and fauna and ultimately enhance the environment. Our Environmental Management strategy is part of our Integrated Management System that is based upon AS/NZS ISO 14001:2016 and certified accordingly.

We strive to develop sustainable buildings that minimise environmental impacts during their construction and operation.

We will champion the cause with our clients to design and construct buildings that provide positive environmental impacts.

We will promote innovative approaches that provide superior environmental outcomes

Our vision is supported by a series of measurable objectives, which will demonstrate progress towards its realisation. The list of objectives and the strategies which will be used to achieve them are included in this document.

This vision statement, its objectives, and strategies form the *Multi Span Australia Environmental Policy*.

This policy has been developed such that it will:

- be appropriate to the nature, scale and environmental impacts of our activities, products and services;
- include a commitment to continual improvement and prevention of pollution;
- include a commitment to comply with relevant environmental legislation and regulations and other requirements as determined by the Board of Directors;
- provide a framework for setting and reviewing environmental objectives and targets;
- be supported by an EMS which will provide guidance on the documentation, implementation, and communication of the objectives of this policy to all employees;
- be available to relevant interested parties.

Martin Hood
